The model of the means and the method of identification of bovine animals

All bovine animals on a holding shall be identified within 20 days from birth and in any case before the animal leaves the holding of birth. Bovine animals shall be identified with two approved eartags or one eartag and an electronic identifier (it is attached to the left ear of the bovine).

The eartag of a bovine animal is yellow and made of plastic. The eartag shall bear the ISO code denoting Estonia "EE" and the unique registry number of the animal consisting of ten figures. The eartag shall also bear a bar code carrying the information which is printed on the eartag.

Information on the first part of the eartag is printed in four rows: the logo and the ISO code denoting Estonia "EE" are printed in the first row, the first five numbers of the registry code consisting of ten figures are printed in the second row, the bar code is printed on the third row and the following five numbers are printed in the fourth row.

Example:

1st row: logo

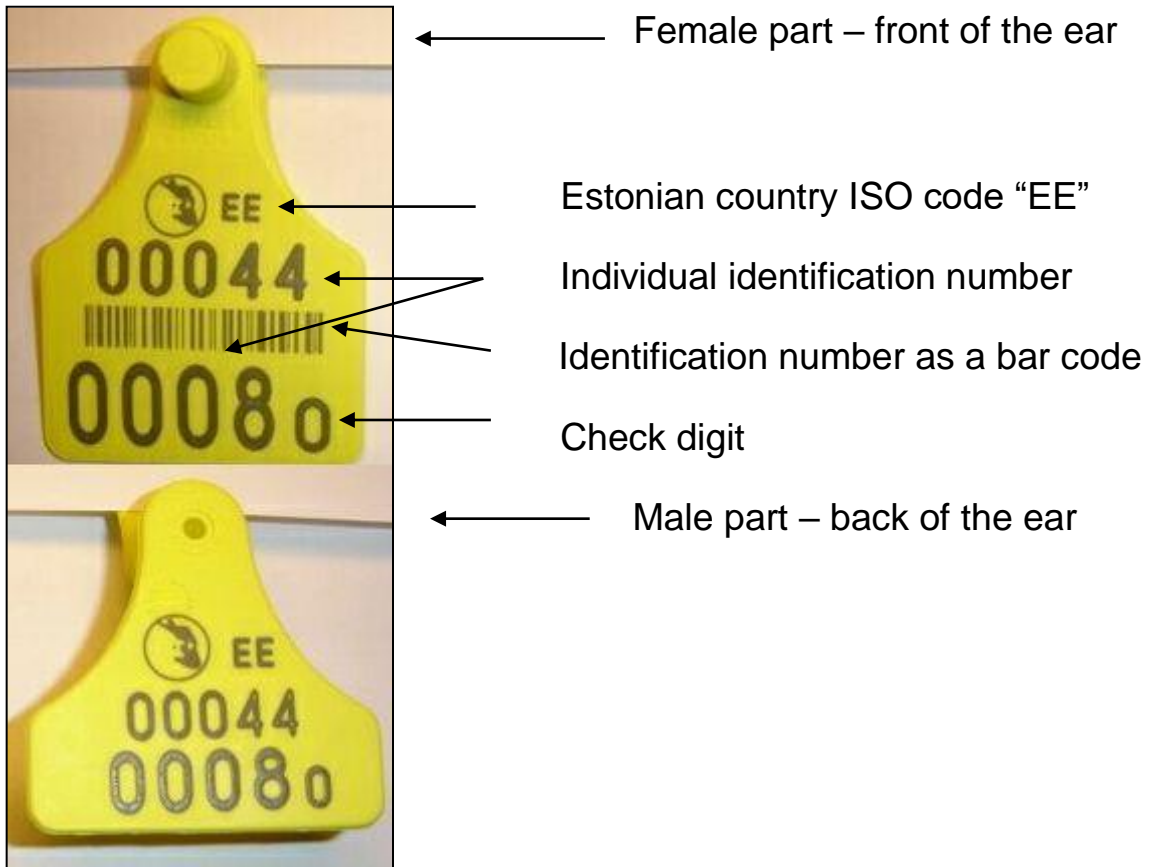

2nd row: 00044

3rd row: bar code

4th row: 00097

Information on the other part of the eartag is printed in three rows: the logo and the ISO code denoting Estonia "EE" are printed in the first row, the first five numbers of the registry code consisting of ten figures are printed in the second row and the following five numbers are printed in the third row.

- **Model of the eartag used for identification of bovine animals**

Animal identification number shown on the plastic eartag shall be read in the following sequence “EE0004400080”.

- **Model of the electronic eartag used for identification of bovine animals**

Holding register

The keeper of animals is required to keep an up-to-date register of farm animals kept in the herd in manual or computerised form.

The register must set out at least the following information concerning every bovine animal:

1. Registry number of the animal;
2. Registry number of the holding;
3. Date of birth, gender and breed;
4. Date of movement;
5. Date when the animal was lost, perished, slaughtered for own consumption, for emergency reasons, for inspection purposes or to prevent the spread of infectious animal disease;
6. Names, addresses and personal identification codes or commercial registry codes of the entities selling and purchasing the animals.

<u>Column</u>	<u>Contents</u>
1.	Date of birth
2.	Identification code of the animal
3.	Gender
4.	Breed
5.	Name, identification code and breed of the sire
6.	Name and identification code of the dam / reproduction characteristics
7.	Registration number of the holding
8.	Results of weighing
9.	Date of insemination / identification code of the bull / weight
10.	Date and reason of moving out of the herd / into the herd
11.	Data of the selling / buying (name, address, registry code), comments
